The right tool for my APPLICATION

A little handy chart to help you figure that out. The applications are sorted by extra small to extra large solder pads, and by medium and high energy requirements.

Solder pad size

- XS Very small solder pads 0.2-1.25mm
- S Small solder pads 0.8-1.6mm
- M Medium solder pads, universal soldering, 1.0-3.0mm
- L Larger solder pads, high mass soldering
- XL Very large solder pads, high mass soldering (shielding)

Energy requirement

- ME Medium Energy requirement
- HE High Energy requirement

TRUSTED technology

WX

State-of-the-art equipment to meet every soldering challenge

WT

High flexibility for versatile applications

WE

Robust unit for custom applications

**GUARANTEED
QUALITY**

**HIGH
PRODUCTIVITY**

**MAXIMUM
FLEXIBILITY**

Weller supports you with:

- Fast response and processing time
- Automated tool detection, assignment of control parameters
- Microprocessor-controlled PID regulation, accuracy and stability (IPC)
- Extensive range of premium-quality products and accessories

Weller offers customized soldering solutions.

To help you better understand our wide product portfolio, we have segmented our products into 3 categories:

- The WX Line, featuring our premiere professional soldering equipment
- The WT Line, setting a new standard for soldering
- The WE Line - and the always reliable and cost-saving

ESD-safe

Weller devices are ESD-safe and can be used in electrostatic protected areas.

WX LINE

STATE-OF-THE-ART EQUIPMENT TO MEET EVERY SOLDERING CHALLENGE

**COMPLETE
COMPATIBILITY**

**HIGHEST
PERFORMANCE**

**FIVE PROS -
ANY CHALLENGE**

Use as benchtop controller

Integrated USB ports provide WX stations with a connection to and control over soldering fume extractors, preheat plates and programmable logic controllers (PLC). The connected tools feed back their parameters and status to the display.

**ISO MIL IPC
TRACEABILITY
QUALITY**

Safe manual soldering

Weller WX stations make the manual soldering process safer, a crucial factor in the automotive, aerospace and medical technology industries. This is guaranteed by temperature and tool locking, and tool-specific temperature settings.

Traceability

All WX stations are traceable and can be integrated into an existing traceability process.

WT LINE

HIGH FLEXIBILITY FOR VERSATILE APPLICATIONS

EASY TO USE

COST-EFFICIENT

FUNCTIONAL

Multi-functional LC display

Unique LC display with a detailed overview of all functions. Adjustable background illumination. Power bar graph allows visual monitoring of the easily-readable output power from the station to the soldering iron tip.

Quick change system

Passive tip system allows quick exchange of heating elements when the iron is hot. Can easily switch out tips. Tip replacement independent of the heating element.

Stackable units

The WT1 / WT1H soldering stations can be stacked on the WTHA1 hot air station, or on each other, saving space on the workbench.

New menu button

Provides ultimate user friendly access to and navigation in the menu structure.

Backwards compatibility

All soldering irons of the WSD and WD soldering stations can be connected. (except micro soldering irons)

2-in-1 WSR safety rest

The soldering iron holder can be rotated 180°. The user can choose between wet and dry cleaning.

WE LINE

ROBUST UNIT FOR CUSTOM APPLICATIONS

POWERFUL

RELIABLE

COST EFFICIENT

70 W Soldering Iron

More power, more control, toolless tip change solution, less hand fatigue, more precision

Digitales LCD screen

Easily monitor your preset levels

Menu control buttons

Intuitive navigation, temperature, password protection, standby and auto setback modes

Standby

Equipment protection and efficient energy use

Temperature stability and lock

High quality and repeatable results

70 W power station

70 W power housed in functional new design Fast heat-up and recovery

UNIQUE!

FLEXIBLE POTENTIAL EQUALIZATION

All Weller soldering stations are equipped with various options for potential equalization.

A unique potential equalization connection is provided free of charge. The jack sleeve has 4 possible settings

Hard ground

Without plug (original delivery)

Potential equalization

With plug - equalization line on center contact.

Floating

With plug

Soft ground

With plug and resistor soldered in. Grounding according to selected resistor.

NO CALIBRATION NEEDED

Exact temperature settings down to the degree

The parts of the Weller heating element which determine the temperature have the same physical material characteristics and do not change over time or during use.

If higher accuracy than these standards is required, fine adjustment is possible.

Electronic control units do not wear out. Closed-loop temperature regulation & high quality sensor & control technology assure the temperature stability of the soldering tool during its lifetime. Built according to IPC J-STD001 D and DIN EN 61191-1.

ESD-safe

Weller devices are ESD-safe and can be used in electrostatic protected areas.

BENCHTOP Controller

Integrated USB ports provide WX stations with a connection to and control over soldering fume extractors, pre-heat plates and programmable logic controllers (PLC). The connected tools feed back their parameters and status to the display.

USB port

Firmware updates and registration are quick and easy using USB sticks.

Multifunctional tool detection

All connected tools and accessories are detected automatically by the stations and their name(s) shown.

Robot output

A digital, optically decoupled robot connection comes standard.

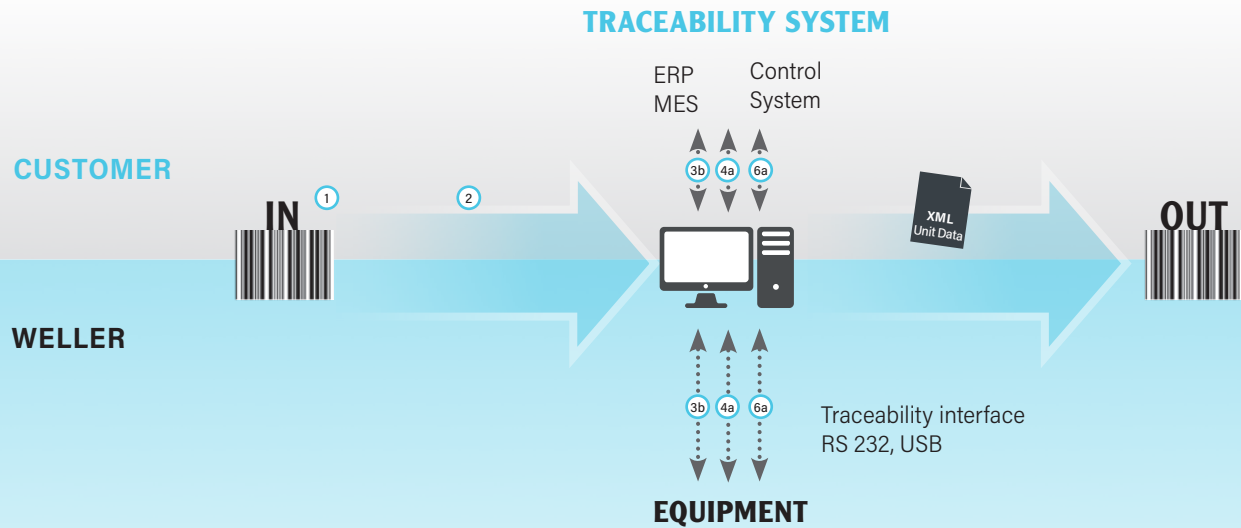

HIGH PERFORMANCE IN

TRACEability Workflow

Traceable Process Control.

The following workflow diagram depicts a serial number with bar code integrated PCB production using the Weller WX station. The workflow includes interaction by the operator and the dialog of the Traceability System with the WX station.

1. Begin processing of product:
Scan PCB or product to be soldered.
2. Transmission of data to the Traceability System.
- 3.a Prepare WX station: The Traceability System delivers process parameter selection data.
- 3.b Parameterization of the WX station
Process parameter lockout:
Auto tool temperature set and lockout.

- 4.a Begin processing of product:

WX Line

THE BEST FOR EACH APPLICATION

Our WX TEAM

The five specialists from the Weller WX team will solve all your problems related to soldering, desoldering and the use of hot air in your manufacturing process.

The entire WX team offers full WX tool compatibility, tried-and-tested benchtop functions and all essential traceability features.

ESD-safe

All WX devices are ESD-safe and can be used in electrostatic protected areas

Huge energy savings Usage sensor

Thanks to an integrated sensor, WX tools are motion activated. This means that they consume power only when they are actually in use. Connected accessories also go into standby mode.

WXA2

**Safe manual soldering**

Weller WX stations make the manual soldering process safer, a crucial factor in the automotive, aerospace and medical technology industries. This is guaranteed by temperature and tool locking, and tool-specific temperature settings.

**Use as benchtop controller**

Integrated USB ports provide WX stations with a connection to and control over soldering fume extractors, pre-heat plates and programmable logic controllers (PLC). The connected tools feed back their parameters and status.

**Intelligent tool detection**

All connected tools and accessories are detected automatically by the stations and shown on the display.

**Multifunctional USB port**

Firmware updates and registration are quick and easy using USB sticks.

**Integrated parameter memory**

Parameters such as standby temperatures and automatic switch-off time can easily be stored in the soldering iron. Parameters only need to be stored once; the soldering iron can then use them with any WX station.

**Maximum safety, maximum flexibility**

A unique potential equalization connection is provided free of charge. The jack sleeve has 4 possible settings: hard ground, potential equalization, floating and soft ground.

**Traceability**

All WX stations are traceable and can be integrated into an existing traceability process.

**Extremely short learning curve**

Multi-language menu guide: German, English, French, Italian, Spanish, Portuguese and Mandarin. Other languages can be implemented on request.

**Robot output**

A digital, optically decoupled robot connection comes as standard.

WXR 3 Rework station

EVERYTHING - AND MORE.

The WXR3 Rework station is the perfect solution for all soldering, desoldering and hot-air jobs. The WXR3 can handle the most demanding tasks but is also ideal for standard jobs. All units can cope with major manufacturing tasks quickly and surely thanks to their straight-forward settings. The station can also be integrated into a traceability process.

600 Watts – unique

The WXR 3 is a 3-channel station with a total output of 600 W. The multifunctional WXR 3 is suitable for all applications, and can work with all WX tools.

Two integrated pumps (self-contained)

A pair of integrated pumps make the system independent of a separate compressed air supply. A high-performance pump for vacuum and hot air, and a separate vacuum pump for pick-up tools.

Automatic / intelligent power management

The rework station provides 600 watts of power. Its intelligent power management function allows the available power to be distributed to the connected tools as required – a total of 600 watts. High-performance tools can be operated at the same time. 3 channels, 200 watts each.

User-friendly and easy to navigate

The LCD display shows all connected tools. Special functions can easily be set at the press of a button.

External compressed air supply

The maintenance-free Venturi unit produces a constant vacuum using an external compressed air supply.

Fastest desoldering iron

With its 120 watts and extremely short heating time, the desoldering iron can easily handle jobs that would have been difficult in the past, including desoldering high mass PCBs.

No tedious cleaning

The new, extended nozzle shaft prevents the suction tube from sticking. Since the suction channel has also been replaced, the once tedious and time-consuming task of cleaning the tool is now a thing of the past.

Quick replacement

Thanks to ingenious mountings, the suction nozzle and solder cartridge can be changed quickly and easily – without the risk of burns or tricky replacement work.

Huge cost savings

The relatively low operating temperature (380°C) and automatic standby mode controlled by the use sensor increase the service life of the suction nozzles by a factor of 3.

Vacuum run-on

A vacuum run-on time can be set to prevent the suction pump blocking.

Two models are available.

The WXDP 120 is designed for horizontal operation and the WXDV 120 for vertical operation.

WXD2

2-Channel Power Unit, 200 W (255 W)

Order No. WXD2 N

- Cost effective because only one station is needed
- Less rework by optimal use of tools and the correct working temperature. Reduction of running costs by longer tip lifetime.
- Desoldering iron with stand-by mode
- Patented, ESD safe glass display. Simple and fast setting of soldering parameter.
- For operation with external compressed air

Scope of supply	Order No.	Model	Description
	WXD2N	WXD2	2-Channel Power Unit, 200 W (255 W)

WXD2010

2-Channel Solder- and Desoldering Station, 200 W (255 W)

Order No. WXD2 01 0N

- Desoldering station WXD 2, 2 channels with desoldering iron WXD 120
- Soldering- and desoldering tools with intelligent WX technology
- Connection to external compressed air supply required
- Energy effective: automatic stand-by mode for tools
- Patented, ESD safe glass display. Simple and fast setting of soldering parameter.

Scope of supply	Order No.	Model	Description
	T005 13 201 99N	WXDP 120	Desoldering iron 120 W, 24 V
	T005 13 250 99	XDS 1	Desoldering nozzle Inside Ø 1, 4 mm, Outside Ø 2, 5 mm, Nozzle length 10, 5 mm

WXA2 Hot-Air station

THE PERFECT SOLUTION FOR HOT-AIR AND SOLDERING JOBS.

Clear handling advantages and tangible cost savings in one unit. That's what you get with the WXA2 hot-air station. Ideal for complex hot-air jobs or traditional soldering. The amount of hot air (20 l/min at 6 bar) can be adjusted to any value in range. And of course the entire range of high-performance hot-air and soldering accessories is compatible with this station.

USB port	✓
Equipotential bonding socket	Via 3, 5 mm pawl socket on back of device.

Adjustable air amount

The amount of air can be controlled using the rotary knob. An external compressed air supply is needed. The amount of air is displayed in percent.

Adjustable operating mode

The unit has 3 separate operating modes.

Operating mode level 1 – the air flow continues for as long as the button on the hot-air iron or foot switch is pressed.

Operating mode level 2 – if the button is pressed once, the hot-air flow continues for between 0 and 300 seconds, stopping at the end of the set time.

Operating mode level 3 – the WXHAP 200 switches on with one press of the button and off with the second press.

Finger and foot switches

The air flow is controlled using the finger switch in the handle.

It can also be controlled by a foot switch (optional).

Ion trap

All WX devices are ESD-safe and can be used in electrostatically protected areas. The ion trap in the iron ensures that the emerging hot air is free of static electricity.

Inert gas operation

An inert gas (nitrogen) can also be used for challenging soldering jobs to generate the hot air.

200 W (255 W)

WX
compatible

TRACEability
qualified

Order No. WXA2 01 0N

- Power unit WXA 2, 2 channels with hot air iron WXHAP 200
- Best set for hot air tasks
- Simultaneous operation of 2 soldering tools
- For operation with external compressed air

Scope of supply	Order No.	Model	Description
	T005 15 152 99N	WDH 30	Safety rest with dry cleaner
	T005 27 119 99N	WXHAP 200	Hot air iron 200 W, 24 V with hot air nozzle R 06 round Ø 3.0 mm
	T005 87 278 21	R04	R 04 Hot Air Nozzle Round, Ø 1,2 mm, for HAP 1 and HAP 200
	T005 87 278 22	R06	R06 Round Nozzle for HAP 1 and HAP 200, Ø 3.0 mm
	WXA2N	WXA2N	2-Channel Power Unit, 200 W (255 W)

Soldering Stations
Soldering iron and safety rest
Soldering tips and nozzles
Preheating plates
Soldering bathes
Circuit board holder
Solder feeder
Hot air heating gun
Temperature measuring
Accessories

WX2 Soldering Station

A NEW ERA OF SOLDERING.

Cost saving because only one power unit is needed for different applications.
Use as benchtop controller saves energy.
Lowering the running costs by enlarged tip lifetimes.
Reduction of rework due to optimized tool use and correct working temperature.

Interface	1x USB, 2x RS232, 1x Switching output
ESD-safe	✓
Automatic tool identification	✓
Traceability (unit data)	✓
Display	255 x 128 dots / Backlighting
USB port	✓
Equipotential bonding socket	Via 3,5 mm pawl socket on back of device
Benchtop controller	✓

Visual process control through LED signal function

Blue LED ring light (light is out = Off, light is blinking = standby or heating up, light is on = tip ready for use)

Tailor-made performance

Weller heating technologies deliver precise performance on demand.

Quick heating time

WX soldering irons heat in ultra-quick time and can be used immediately.

Temperature stability/accuracy

All WX soldering tools have a temperature stability of ± 2° C and a temperature accuracy of ± 9° C, as per IPC standard.

Intuitive operation

The robust touch screen is a capacitive touch panel made of real glass. It is anti-static and temperature-resistant. The turn-and-click wheel with confirm button allows intuitive operation.

Huge energy savings Motion sensor

Thanks to an integrated sensor, WX tools are motion activated. This means that they consume power only when they are actually in use. Connected accessories also go into standby mode.

WX2

2-Channel Power Unit, 200 W (255 W)

200 W (255 W)

Order No. WX2N

- Innovative operation concept
- Robust touch screen with ESD safe glass
- Intuitive use with turn-click-wheel with enter key and finger guide.
- Blue LED backlighting
- Multilingual menu navigation
- High functionality
- No safety rest with Stop & Go function needed thanks to integrated acceleration sensor
- Optimized precision, better stability by sensor in the soldering iron
- Specific parameterization of tool by storage medium in hand piece
- Visual process control via blue LED ring light

Scope of supply	Order No.	Model	Description
	WX2N	WX2	2-Channel Power Unit, 200 W (255 W)

WX2020

2-Channel Soldering Station, 200 W (255 W)

200 W (255 W)

Order No. WX20 20 N

- Power unit WX 2, with 2 channels, 2 soldering irons WXP 120 and 2 safety rests WDH 10
- Simultaneous operation of 2 soldering tools

Scope of supply	Order No.	Model	Description
	T005 15 121 99N	WDH 10	Safety rest with dry cleaner
	T005 29 201 99N	WXP 120	Soldering iron 120 W, 24 V with Power-Response Heating Technology
	T005 44 704 99	XT B	Soldering tip chisel Ø 2,4 mm
	WX2N	WX2	2-Channel Power Unit, 200 W (255 W)

WX2021

2-Channel Soldering Station, 200 W (255 W)

200 W (255 W)

Order No. WX20 21 N

- Power unit WX 2, with 2 channels, soldering irons WXMP and 1 tweezers WXMT
- Simultaneous operation of 2 soldering tools

Scope of supply	Order No.	Model	Description
	T005 13 179 99N	WXMT MS	Micro desoldering tweezers 2 x 40 W, 12 V (hand piece without tips) with Active-Tip Heating Technology
	T005 15 169 99N	WDH 60	Safety rest with dry cleaner for WXMT Micro desoldering tweezers
	T005 15 171 99N	WDH 51	Safety rest with dry cleaner for WXMP Micro soldering iron
	T005 29 213 99N	WXMP MS	Micro soldering iron WXMP MS 40 W, 12 V (hand piece without tips) with Active-Tip Heating Technology
	T005 44 616 99N	RTM 013 S MS	RT Micro MS soldering tip, chisel Ø 1,3 x 0,4 mm
	T005 44 657 99N	RTW 2 MS	MS soldering tip set 0,7 x 0,4 mm, 45°
	WX2N	WX2	2-Channel Power Unit, 200 W (255 W)

WX1 Soldering station

A CLASS OF ITS OWN.

The powerful, user-friendly WX1 soldering station has redefined the world of soldering. Maximum process reliability for manual soldering tasks is guaranteed for the automotive, aerospace and medical technology industries. Any soldering process can be programmed easily using these intelligent tools, and a unique level of dependability assured. Whatever technique is used, these devices are intuitive and easy to operate thanks to their touch screens and language options.

WX1010

1-Channel Soldering Station, 200 W

Order No. WX10 10 N

- High Powered Digital Soldering Stations WX 1
- Capacitive glass touch screen is chemical and temperature resistant
- Turn and click wheel with enter key and finger guide is intuitive to use
- Multi-language menu , ready for automation using RS232 Serial I/O commands
- Large graphic LCD display can be viewed from all angles
- Acts as a benchtop controller for the WHP 1000 / WHP 3000 hot plates
- Acts as a benchtop controller for the Zero Smog 4V / 6V Filtration units
- Multi-purpose USB port for parameter configuration and DATA LOGGING
- Compatible with all WX series soldering pencils
- Compatible with WXMT-MS desoldering tweezers

WT and WR series our Technology Line

THE CAN-DO SOLDERING STATIONS

Whenever it takes user-friendliness and ease of use, the soldering products of the Weller Technology line set new standards. Due to their great price/performance ratio, they are perfect tools for cost-efficient soldering applications.

 COMPLETE
COMPATIBILITY

Cost-efficient

The short warm-up time for the soldering tools and a faster and simpler method for changing tools also enable lightning-fast work and ensure high time savings as a result.

Easy-to-use

The user-friendly and easy handling allows a quick, uncomplicated handling of the equipment.

Backwards Compatibility

All soldering irons of the WSD and WD soldering stations can be connected. (except micro soldering irons)

**WTP90 | 90 W SOLDERING IRON**

The high-tech iron for universal use with power response tips.

**WP65 | 65 W SOLDERING IRON**

For delicate and small applications.

**WP80 | 80 W SOLDERING IRON**

Short tip-to-grip distance for all standard soldering applications.

**WSP80 | 80 W SOLDERING IRON**

For all standard soldering applications.

**WP120 | 120 W SOLDERING IRON**

For bigger solder joints.

**WSP150 | 150 W SOLDERING IRON**

For soldering applications with high heat demand

**WMRP | 40 W MICRO-SOLDERING IRON**

For very small components with high energy demand

**WMRT | 2 x 40 W MICRO-DESOLDERING TWEEZERS**

Slim tweezers for excellent De-/soldering

**WTA50 | 2 x 25 W DESOLDERING TWEEZERS**

For safe desoldering jobs.

**HAP1 | 100 W SOLDERING & DESOLDERING IRON****DSX80 | 80 W DESOLDERING IRON**

For horizontal application.

DXV80 | 80 W INLINE DESOLDERING IRON

For vertical application.

WHP80 | 80 W HEATING PLATE
Preheating plate.**WSB80 | 80 W SOLDER BATH**

Connectable to all Weller 80 W digital station.

WSB150 | 150 W SOLDER BATH

Connectable to all Weller 150 W stations.

WR3M

3-Channel Power Unit, 360 W (400 W)

360 W (400 W)

Order No. WR3M N

- Digital Self-Contained Multi-Channel Rework Station - 120 V / 400 W
- 3 Independent tool channels with automatic tool recognition
- Simultaneous use of multiple tools (3) - 21 tool options possible
- Self contained vacuum and air
- PC connectivity and data logging software included
- ESD safe

WR3000M

3-Channel Power Unit, 360 W (400 W)

Order No. WR30 00 MN

- WR3M multi-channel, hot air, desoldering, soldering rework system
- 400 watts of power over 3 independently-controlled channels
- Application flexibility with up to 21 tool options
- PC Connectivity and data logging software included

Scope of supply	Order No.	Model	Description

WR2 Rework station

REWORK ON HIGHEST LEVEL

One station meets the requirements of a rework workplace.
Unique connecting compatibility of all tools.
2 independent tool channels with automatic tool recognition
guarantee the simultaneous operation of 2 soldering tools.
Tools are permanently ready for use.

TECHNICAL DATA

Channels	2

WE1010 Soldering Station

THE MOST POWERFUL STATION IN ITS CLASS

With the WE Weller introduces a new digital 70 W soldering station especially designed for entry level professional soldering tasks, cable assembly and education. Its high power allows a fast heat-up and short recovery time of the iron, improving process speed, efficiency and precision during the soldering process.

Powerful, user friendly and cost-efficient

- Powerful with 70 W – gets your soldering job done faster
- Easy to handle high performance iron
- Intuitive navigation
- Low total cost of ownership

Maximum reliability and protection

- Temperature stability and temperature lock protects tips and components, affording a consistently high quality process with repeatable soldering results
- Flexible, heat resistant silicon cable
- Reinforced safety rest for secure iron storage

Power switch on the front

Convenient on/off control

Menu control buttons

Intuitive navigation of temperature, password protection, standby and auto setback modes

ET tip family

Wide range of longlife ET tips

WE1010

1-channel-soldering station with WEP 70 soldering iron and PH 70 safety rest

Order No. WE10 10 NA

- Power unit, 1 channel with soldering iron WEP 70 and safety rest PH 70
- 70 W solder iron with ergonomic handle and providing toolless tip change
- ESD safe station, iron and heat-resistant silicon cable for safe handling
- Using ET soldering tips
- Standby mode and auto setback conserves energy, protects equipment
- Password-protected to preserve settings

BGA / QFP Repair systems

HIGHEST PRECISION

Weller provides efficient coverage for the entire reworking process with its repair and rework systems: Desoldering, pad cleaning, positioning and soldering in. Thanks to state-of-the-art camera technology, even small components can be manually positioned and repaired—with the greatest precision and absolute reliability along with optimum process control.

Ion trap

An ion trap provides hot air free of charge carriers.

Hot air pencils

The powerful, ergonomic hot-air pencils enable precise and efficient work. The extensive range of nozzles for these tools make them suitable for extensive application areas.

Optimum precision

The state-of-the-art technology in Weller heat guns provides optimum precision when soldering and desoldering SMD assemblies. This takes advantage of Weller's patented nozzle technology.

MULTIFUNCTIONAL COMPONENT SIZES

EASY-TO-USE

COMPACT DESIGN

Heating from above: selective and sensitive

The hot gas heater with patented nozzle system coupled with digital control electronics for temperature monitoring and regulation of the air flow rate facilitates the finely metered supply of heat to the components. A temperature sensor placed directly in the hot gas nozzle prevents thermal overload of the component and efficiently regulates the top heater, providing maximum process control.

Infra-red bottom heating

The temperature-regulated two-zone infrared bottom heater provides rapid, yet precisely controlled warm-up at homogeneous substrate temperatures.

Monitoring software

The monitoring software determines temperature profiles and facilitates definition of the optimal soldering process.

WHA 3000 Hot-Air Station

THE VERSATILE SYSTEM FOR REPAIR AND REWORK OF FINE PITCH AND BGA COMPONENTS.

Performs demanding repair tasks on circuit boards with complex fine-pitch surface mounted components. The advanced control technology coupled with user-friendly operation, guarantees precision of repair productivity and quality.

WHA3000PS

700 W WT compatible

Order No. WHA3 00 0PS N

- 700 watts of power allow work larger dual in line and quad pack components
- Self contained internal air and vacuum
- Set with Infrared preheating plate, circuit board holder and 0.669" x 0.925" hot air nozzle (Order no. T005875721). More versions available.
- An ion trap assures that only EDS safe hot air is directed at the component
- Memory to store up to 10 thermal profiles ensures process repeatability
- Holds circuit board up 310 x 320 mm for outstanding versatility
- IR heating plate has a total heated area of 120 x 190 mm with 3 ceramic elements for controlled, even heat.
- Set and read temperature are digitally displayed
- An external sensor can be connected to display actual temperatures at specific areas of the circuit under repair to further guarding against damage to sensitive
- Hot place can be controlled from its own independently or integrated into the control system

WQB 4000 Repair system

**MAXIMUM PRECISION. MAXIMUM FLEXIBILITY.
MAXIMUM USER-FRIENDLINESS.**

Weller's WQB 4000 repair and rework station combines a completely new design with state-of-the-art split optic camera technology to provide users with absolute reliability, optimum process control and enhanced ease of use. The system was engineered to bring nely tuned balance of automated technology for component pick-up and positioning with a semi-automated rework cycle.

Advanced Automation by the soldering experts

HIGHEST PRECISION. SUPERIOR RELIABILITY.
INCREASED PRODUCTIVITY. ALL FROM ONE SOURCE.

More than half a century of experience in soldering and superiority in innovation, allows us to take our customers to the next step in achieving production excellence. The new WTBR1000 Benchtop Robot represents a one-of-a-kind synergy of precision, reliability, and productivity of soldering tasks.

PRECISION

LED illuminated camera enables high-precision soldering with superior quality control

"On point" solder feeder next to the iron smoothly pulls the solder wire through the tube

Robust, sturdy construction protects the unit from disruptive movement or vibration

PRODUCTIVITY

Double drawer system for continuous production

WT1H soldering station: the brain behind the robot: 150 W, precise temperature control and stability.

RELIABILITY

Easy to learn and use software

Safety cover fully encloses the integrated fume extraction system, protecting the user, workpiece, and equipment

Working area allows maximum flexibility (Drawer height 100 mm)

Fully-enclosed system offers triple protection

Being a fully-enclosed system, with integrated fume extraction, the WTBR1000 Benchtop Robot allows our customers to achieve the highest level of safety: protecting the operator, the workpiece (PCB) and the machine.

Double drawer system

A double drawer system allows continuous production thereby providing much higher process throughput, improving productivity and offering flexibility.

Easy to learn and use software

Enabling operators to start using the unit comfortably and quickly.

“On point” solder feeder

The solder feeder is designed to be in close proximity to the workpiece (PCB), pulling the wire rather than pushing it through the feeder tube.

WT1H soldering station

The WTBR1000 is equipped with Weller's high performance WT Line soldering tools, ensuring consistent quality of solder joints.

Integrated cleaning tool process

Metal brushes clean soldering tips

LED illuminated camera

Enables high-precision soldering with superior quality control.

Integrated fume extraction system

Safety cover fully encloses the integrated fume extraction system, protecting the user, workpiece, and equipment.

WTBR1000 Solder Robot

ADVANCED AUTOMATION BY THE SOLDERING EXPERTS

Highest precision. Superior reliability. Increased productivity. All from one source.

The WTBR1000 represents a one-of-a-kind synergy of precision, reliability, and productivity of soldering tasks.

Based on the proven component of the Weller portfolio, the system allows continuous production and thereby providing a significantly higher process throughput, improving productivity and offering flexibility.

WTBR1000

WTBR 1000 Soldering Robot

Order No. WTBR 10 00F TLCA

- Highest soldering precision and superior reliability due to integrated Weller Technology Line soldering tools, as well as the solder feeder being in close proximity to the workpiece and an integrated LED illuminated camera
- Maximizing productivity thanks to double drawer system enabling continuous production
- Allows significant cost savings versus hand soldering
- Simple programming and data capturing
- Easy to learn and use software
- Safety cover fully encloses the integrated fume extraction system, protecting the user, workpiece, and equipment
- The robust and sturdy construction delivers precise solder joints at any time
- The fully-enclosed system provides a complete and CE-compliant solution to the customer

Soldering iron and Safety rests

THE PERFECT DUO FOR ALL SOLDERING APPLICATIONS

Weller soldering irons and safety rests are perfectly matched to guarantee optimum performance of the tools. The safe option for putting down the soldering iron protects against damage and increases the service life of the tools.

The Stop + Go safety rests and integrated sensors in the soldering irons provide for high energy savings. Weller soldering irons and safety rests—the perfect duo for optimum soldering results in the modern manufacturing industry and its diverse requirements.

 **PERFECT
SOLDER JOINTS**

Versatile

The ergonomic design and outstanding performance capacity of Weller soldering irons makes them versatile and able to be used for everything from the smallest soldering points to work with high heat requirements.

Precise

Weller soldering irons provide the highest precision with the shortest warm-up time.

Active-tip technology

Jobs with high heat requirements which standard tools cannot handle, for example micro soldering work under a microscope.

Silver-line technology

For universal applications in which tip prices play a big role: LT tips are the most cost-effective in the whole product line

Response technology

Soldering SMD components for small solder pads with increased heat demand.

Soldering SMD components for small solder pads with increased heat requirements.

Efficient

Quick and easy tip change without any extra tools.

2-in-1 WSR safety rest

The soldering iron holder can be rotated 180°. The user can choose between wet and dry tip cleaning.

Weller HEATING TECHNOLOGIES

CONCENTRATED POWER AT THE TIP.

Weller® TECHNOLOGY OVERVIEW

Soldering Irons

WX LINE

WXP 65 Set

Soldering iron 65 W, 24 V with safety rest

Order No. T005 29 212 99N

- Intelligent soldering Iron 65 W, 24 V
- For small and medium components with average energy demand
- For fine solder jobs with WX stations
- Parameter memory such as standby temperatures, automatic switch-off time
- Reduces total costs of ownership due to motion sensor
- Fast recovery time
- Interchangeable XNT soldering tips at low cost prices
- Power Response heating technology with improved sensor position
- Fast reaction time

Scope of supply	Order No.	Model	Description
	T005 15 121 99N	WDH 10	Safety rest with dry cleaner
	T005 29 211 99N	WXP 65	Soldering iron 65 W, 24 V with Power-Response Heating Technology
	T005 44 851 99	XNT A	Soldering tip chisel 1,6 x 0,4 mm

WXP 80 Set

Soldering iron 80 W, 24 V with Silver-Line Heating Technology

Order No. T005 29 209 99N

- 80 W, 24V
- For medium components with high energy demand
- For universal soldering jobs with WX stations
- Parameter memory such as standby temperatures, automatic switch-off time
- Visual process control through LED signal function
- Extensive range of LT soldering tips
- Silver-Line heating technology
- Fast heating up

WXMT MS Set

Micro desoldering tweezers 2 x 40 W, 12 V
with Active-Tip Heating Technology.

Order No. T005 13 203 99N

- Intelligent Micro desoldering tweezers 2 x 40 W, 12 V
- Military Standard (MS)
- RTW Soldering tips grounded separately
- For soldering and desoldering of SMD components with high energy demand
- Slim tweezers for excellent De-/soldering works, tweezer is compatible with all WX Stations.
- Parameter memory such as standby temperatures, automatic switch-off time
- Reduces total costs of ownership due to motion sensor
- ESD safe to protect sensitive components
- Active Tip (Cartridge)-System allows fast and save exchange of soldering tip despite a hot soldering iron

Scope of supply	Order No.	Model	Description
	T005 13 179 99N	WXMT MS	Micro desoldering tweezers 2 x 40 W, 12 V (hand piece without tips) with Active-Tip Heating Technology
	T005 15 169 99N	WDH 60	Safety rest with dry cleaner for WXMT Micro desoldering tweezers
	T005 44 652 99N	RTW 2 45°	Soldering tip set 0,7 x 0,4 mm, 45°

Desoldering Irons

WX LINE

WXDP 120

Desoldering iron 120 W, 24 V

120 W

WX
compatible

TRACEability
qualified

Order No. T005 13 201 99N

- Rework conductive irons WXDP
- Ideal for professional rework applications of the latest electronic components
- Soldering and desoldering parameters can be saved easily on the iron
- Heats up within 35 sec. only with stand-by function

Scope of supply	Order No.	Model	Description
	T005 13 250 99	XDS 1	Desoldering nozzle Inside Ø 1, 4 mm, Outside Ø 2, 5 mm, Nozzle length 10, 5 mm
Accessories	Order No.	Model	Description
	T005 87 657 73N	Maintenance set for WXDP/DSX 120	Maintenance set for WXDP 120 and DSX 120
	T005 87 658 01N	PDN	PDN Pliers for changing nozzles.

WXDV 120 Set

Desoldering iron set for vertical applications, with safety rest

Order No. T005 13 205 99N

- 120 W, 24 V
- Temperature range 200 °F - 850 °F
- Heat-up time ca. 35 sec. (200 °F - 660 °F)
- Setback capable
- Blue LED indication light
- Integrated tin collector
- Internal parameter storage (Zero Tolerance)

Scope of supply	Order No.	Model	Description
	T005 13 204 99N	WXDV 120	Desoldering iron 120 W, 24 V
	T005 13 252 99	XDS 3	Desoldering nozzle, Inside Ø 1,0 mm, Outside Ø 2,3 mm, Nozzle length 10,5 mm
	T005 13 254 99	XDS 5	Desoldering nozzle, Inside Ø 1,8 mm, Outside Ø 3,3 mm, Nozzle length 10,5 mm
	T005 15 153 99N	WDH 40	Safety rest with dry cleaner for DXV 80 and WXDV 120 desoldering iron
	T005 87 418 19	0058741819	Filter cartridge for WXDV 120 (5 pieces)
	T005 87 657 72	Conus cleaner for WXDP/WXDV 120 & DSX 120	Conus cleaner for WXDP 120 / WXDV 120 / DSX 120
	T005 87 657 73N	Maintenance set for WXDP/DSX 120	Maintenance set for WXDP 120 and DSX 120
	T005 87 658 01N	PDN	PDN Pliers for changing nozzles.

Hot Air Irons

WX LINE

WXHAP 200 Set

Hot air soldering iron set with safety rest

Order No. T005 27 120 99N

- 200 W, 24 V
- Temperature range 50°C to 550°C
- Blue LED light
- Internal Parameter storage (zero tolerance)
- Hot air flow ionic free

Scope of supply	Order No.	Model	Description
	T005 15 152 99N	WDH 30	Safety rest with dry cleaner
	T005 27 119 99N	WXHAP 200	Hot air iron 200 W, 24 V with hot air nozzle R 06 round Ø 3.0 mm
	T005 87 278 21	R04	R 04 Hot Air Nozzle Round, Ø 1,2 mm, for HAP 1 and HAP 200
	T005 87 278 22	R06	R06 Round Nozzle for HAP 1 and HAP 200, Ø 3.0 mm

WMPR Set

Micro soldering iron WMRP with safety rest

40 W (55 W_{RT 1.1})**WT**
compatible**Active Tip****RTM**

Order No. T005 29 190 99N

- WMRP 55 Watt (Max.) micro soldering pencil with RT3 tip and WDH50 safety rest
- Compatible with WD1M / WD2M series soldering stations and WR3M / WR3ME series rework stations
- Made of aluminum with chrome plating and weighs just 75g
- The "tip to grip" distance is just 45 mm, placing you close to the work
- The pencil powers down when placed in the tool holder to extend tip life
- Compatible with WDH 50 safety rest (order no. 0051515699)
- ESD safe to protect sensitive components

Scope of supply	Order No.	Model	Description
	T005 15 156 99N	WDH 50	WDH 50 Safety Rest with Stop+Go Function for WMRP Micro Soldering Pencil with FE-attachment
	T005 29 171 99N	WMPR	Micro soldering iron WMRP 40 W, 12 V (hand piece without tips) with Active-Tip Heating Technology

WMRT Set

Micro desoldering tweezers WMRT with safety rest

80 W (2 x 40 W)**WT**
compatible**Active Tip****RTW**

Order No. T005 13 173 99N

- Micro desoldering tweezers 2 x 40 W, 12 V
- For soldering and desoldering of SMD components with high energy demand
- Slim tweezers for excellent De-/soldering, compatible with the rework station WR 3M and WT 2M soldering station
- RTW solder tips can be changed quickly and easily
- Active Tip (Cartridge)-System allows exchange of soldering tip despite a hot soldering iron
- Extremely short heating time
- Standby function
- Extremely quick heating time (100°/sec)
- Energy saving standby and auto off functions
- ESD Safe

Scope of supply	Order No.	Model	Description
	T005 13 174 99N	WMRT	Micro desoldering tweezers 2 x 40 W, 12 V (hand piece without tips) for Active-Tip Heating Technology

Order No. T005 13 175 99N

- Micro desoldering tweezers WMRT-MS handle only, no tip - 12 V / 80 W (2 x 40 W)
- Compatible with WMRTH safety rest
- MS handles and MS soldering tips have to be used together. MS soldering tips are for use with MS handles only.
- RTW-MS series tweezers use RTW-MS series tip cartridges
- Ideal for soldering and desoldering of very small SMD components
- Quick tip exchange
- Extremely quick heating time (100°/sec)
- Energy saving standby and auto off functions
- ESD Safe
